EDUCATION

Ph.D. in Economics, Nanyang Technological University Supervised by Prof. Jonathan Tan and Prof. Jubo Yan	08/2021-08/2025
Master of Economics, National University of Singapore Applied Economics Track	08/2020-06/2021
Bachelor in Economics, Beijing Normal University International Economics and Trade - Portuguese (Double Degree) GPA: 93.38/100 (Top 1)	09/2015-06/2019
Columbia University Summer School Program, Excellent Student Award	07/2016

PUBLICATION

Zhou Yexin, Ru Chen, Yangyang Shen, and **Xinyu Li**. "Does Parental Migration Alleviate Multidimensional Poverty among Left-behind Children in Rural Areas?." *China & World Economy* 33, no. 4 (2025): 179-210.

Hongbo Cai, and **Xinyu Li**. "The Impact of Hukou on Family Education Expenditure: Analysis Based on the CFPS Data." *Chinese Journal of Population Science*, no. 1 (2019): 76-87.

RESEARCH INTERESTS

Experimental Economics; Social Preference; Organizational Behavior; Information Transmission

WORKING PAPERS

Persuasive Lies: An Experiment on Multidimensional Communication. (with Jubo Yan, and Jonathan Tan)

A sender-receiver cheap-talk experiment models real-world third-party communication such as credit ratings and online reviews, where a partially informed sender may be aligned or misaligned with the receiver under asymmetric information. It tests whether richer message spaces increase persuasive power while also expanding scope for strategic misinformation, and examines the resulting implications for market efficiency and social welfare.

Fairness as an Excuse: Dishonesty Through Motivated Reasoning (with Jonathan Tan)

Employing a real-effort ball-catching task to mimic a workplace environment, this project tests whether perceived unfairness (objective and subjective) licenses misreporting through motivated reasoning, and whether making accurate norm salient reduces moral wiggle room and cheating.

Lying to Help: Prosocial and Conditional Dishonesty in Feedback Provision (with Jonathan Tan)

Laboratory experiment on organizational feedback and self-reported performance. By varying whether feedback providers' and recipients' incentives are aligned or misaligned, the study shows that providers lie more when dishonesty can be justified by social preferences, and that recipients respond with conditional dishonesty as honesty norms weaken and motivated beliefs make flattering feedback easier to accept.

Inequality, Positive and Negative Framework and Conditional Cooperation of Rural Children——Large-scale field experiments based on public goods and bads. (with Yexin Zhou, Ru Chen, and Jubo Yan)

Large-scale field experiment on children's cooperation behavior in a public-goods game testing how framing (positive vs. negative), non-cognitive skills, and family background shape conditional cooperation.

TEACHING EXPERIENCE

Nanyang Technological University, School of Social Sciences	2021–2025
--	-----------

Lecturer

Principles of Economics (Undergraduate), Fall 2021, Spring 2022, Fall 2022, Spring 2023, Fall 2023, Spring 2024, Fall 2024

Teaching Assistant

Econometrics (Undergraduate), Spring 2024, Fall 2024

Microeconomics (Graduate), Fall 2021, Fall 2022, Fall 2023, Spring 2024, Fall 2024, Spring 2025

CONFERENCE PRESENTATION

ESA World Meeting, Renmin University of China, China	2025
1st Summer School in Experimental and Behavioral Economics, Greece	2024
ASIA PACIFIC ESA Meeting in Singapore, Singapore	2024
The China Annual Conference of Economics, China	2021
ESA World Meeting, Virtual	2020
The China Annual Conference of Behavioral Economics, China	2020

AWARDS & SCHOLARSHIPS

Teaching Award, NTU	2021-2025
Maxdo Scholarship, Maxdo College, BNU	2019
Meritorious Winner, Interdisciplinary Contest in Modeling (ICM)	2018
Excellent Student, Maxdo College, BNU	2017
First Class Academic Scholarship, Maxdo College, BNU	2017
Third Prize, Marketing Competition, Columbia University	2016
